Develop your business
network benefit, personalised support, communication operation, award

Lighting the way to the future
market & technology watch, strategic data

Certified as a competitiveness cluster since 2005, Pôle Véhicule du Futur federates an ecosystem of 500 members: companies, public research structures, training organizations, economic development players and local authorities.

It supports companies in the automotive & mobility sector in their innovation projects and in their transformation to meet the major challenges of ecological and digital transitions, with dedicated programs.

On a national level, Pôle Véhicule du Futur is a member of the French Automotive Platform - PFA - which brings together the automotive & mobility sector in France, as well as a member of France Hydrogen.

As a Qualiopi-certified training organization, it provides training tailored to companies' needs.
